## Times Tables Policy

## Aims

The National Curriculum 2014 states that:
"The principal focus of mathematics teaching in lower key stage 2 is to ensure that pupils become increasingly fluent with whole numbers and the four operations, including number facts and the concept of place value. This should ensure that pupils develop efficient written and mental methods and perform calculations accurately with increasingly large whole numbers."

And
"By the end of year 4, pupils should have memorised their multiplication tables up to and including the 12 multiplication table and show precision and fluency in their work."

The importance of times tables and their links across other mathematical concepts is clear and at Ridgeway, we also understand the importance of reducing cognitive load to enable all children to access the learning with confidence and efficiency. Research suggests that if times tables are embedded in long term memory, the cognitive load of mathematical questions are reduced, therefore it is important that children develop their efficiency in recalling times tables facts.

## Teaching and Learning Approach

Times table facts should be taught explicitly through a variety of methods (NOT JUST TESTING!) to support all children's capacity to recall and apply this knowledge.

## At Ridgeway the following methods are used (see appendix for ideas and further guidance):

1. Active Maths
2. Games
3. Songs
4. Concrete Resources
5. Online Platforms (J2Blast, Hit the Button)
6. Focus Groups

Times table 'checks' and multiplication grids should only be used to inform assessment if it cannot be gauged through other methods, not as a replacement.

## Application of Times Tables in Calculations

In line with the Maths intent, children's understanding of times tables should not only be taught as standalone facts but must also relate and apply to real life contexts in order to develop their wider mathematical understanding.

In class, children should only be solving calculations using the times tables they have previously learnt or been exposed to.

## Importance of Implementing Commutativity When Teaching Times Tables Facts

Commutativity is when 2 numbers can be multiplied and the same answer will be found no matter what order they are in. This understanding reduces the number of times table facts to learn (77) and should be at the heart of all teaching of times table (multiplication) facts. Using this approach also reduces cognitive load and will allow the children to change the order operation to suit their preference and aid their times tables recall.

## Overview

|  | Year 1 | Year 2 | Year 3 | Year 4 |
| :---: | :---: | :---: | :---: | :---: |
| Progression of learning | Number patterns Arrays <br> Concrete objects Pictorial representations | Introduce multiplication, division and equals symbols <br> Introduce language of commutativity (multiplication only). $x 2, \times 5, \times 10$ <br> New learning: <br> x3 <br> Division facts to be learnt alongside times tables once children have an understanding of division | Recap: x3 <br> New learning: $x 11, x 4, x 8, x 6$ <br> Division facts to be learnt alongside times tables | New learning: x12, x9, x7 <br> Division facts to be learnt alongside times tables |
| Language | Lots of Equal groups of Array <br> Sharing equally (for division) | Multiply <br> Times <br> Equal groups of Repeated addition Array <br> Share equally Divide <br> Multiplication facts Division facts <br> Commutative | Multiply <br> Times <br> Share equally <br> Divide <br> Multiplication facts <br> Division facts <br> Commutative | Multiply <br> Times <br> Share equally <br> Divide <br> Multiplication facts <br> Division facts <br> Commutative |
| Number of facts to learn |  | 42 | 26 | 9 |
| New times tables in the order they should be learnt |  | x1, x2, x5, x10, x3 | x $11, x 4, x 8, x 6$ | x12, x9, x7 |

## Times Tables Facts Progression

The facts highlighted in green in the grids below are times tables they have already previously learnt. The times tables grids below should be used as a guide to support the digits chosen for calculations involving multiplication and division (for fluency and problem solving). E.g. Year 3 Aut 2, teaching multiplication will predominantly involve using the $\times 2, \times 5, \times 3, \times 10$ and $\times 11$ times table facts. However, by Sum 2, multiplication and division calculations can also include $\times 4, \times 8$ and $\times 6$ times table facts.

## Year 2

| Y2 Autl | Y2 Aut2 | Y2 Spr1 | Y2 Spr2 | Y2 Sum 1\&2 |
| :---: | :---: | :---: | :---: | :---: |
| 1×2 | 1×5 | $1 \times 10$ | 1x3 | Recap and consolidate times tables facts and division facts. |
| 2x2 | 2x5 | $2 \times 10$ | 2x3 |  |
| $3 \times 2$ | 3x5 | $3 \times 10$ | $3 \times 3$ |  |
| $4 \times 2$ | $4 \times 5$ | $4 \times 10$ | $4 \times 3$ |  |
| $5 \times 2$ | 5x5 | $5 \times 10$ | $5 \times 3$ |  |
| 6x2 | 6x5 | $6 \times 10$ | 6x3 |  |
| $7 \times 2$ | $7 \times 5$ | $7 \times 10$ | $7 \times 3$ |  |
| $8 \times 2$ | $8 \times 5$ | $8 \times 10$ | $8 \times 3$ |  |
| $9 \times 2$ | 9x5 | $9 \times 10$ | $9 \times 3$ |  |
| 10x2 | 10x5 | $10 \times 10$ | 10x3 |  |
| 11x2 | $11 \times 5$ | $11 \times 10$ | $11 \times 3$ |  |
| 12x2 | $12 \times 5$ | $12 \times 10$ | $12 \times 3$ |  |
| 12 | 11 | 10 | 9 |  |

$=42$ new facts

How to teach times tables:

1. Numerical order (1-12)
2. Random order
3. Division facts:

- Numerical order (1-12)
- Random order

4. Increase speed gradually until known with rapid recall

## Year 3

| Y3 Aut 1 | Y3 Aut2 | $\begin{aligned} & \hline \text { Y3 } \\ & \text { Spr1 } \end{aligned}$ | $\begin{aligned} & \hline \text { Y3 } \\ & \text { Spr2 } \end{aligned}$ | $\begin{aligned} & \hline \text { Y3 } \\ & \text { Sum1 } \end{aligned}$ | $\begin{aligned} & \hline \text { Y3 } \\ & \text { Sum1 } \end{aligned}$ | Y3 Sum2 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Recap x2, x5, x10, x3 including division facts. | $1 \times 11$ | 1×4 | 1x8 | 1x3 | 1×6 | Recap and consolidate x $11, \times 4, \times 8$, x6 and division facts. |
|  | $2 \times 11$ | 2x4 | 2x8 | 2x3 | 2x6 |  |
|  | $3 \times 11$ | $3 \times 4$ | 3x8 | $3 \times 3$ | $3 \times 6$ |  |
|  | $4 \times 11$ | $4 \times 4$ | $4 \times 8$ | $4 \times 3$ | $4 \times 6$ |  |
|  | $5 \times 11$ | $5 \times 4$ | $5 \times 8$ | $5 \times 3$ | $5 \times 6$ |  |
| Recap x3 explicitly before $\times 6$, to demonstrate number patterns. | $6 \times 11$ | 6x4 | 6x8 | 6x3 | $6 \times 6$ |  |
|  | $7 \times 11$ | $7 \times 4$ | $7 \times 8$ | $7 \times 3$ | $7 \times 6$ |  |
|  | $8 \times 11$ | $8 \times 4$ | 8×8 | $8 \times 3$ | $8 \times 6$ |  |
|  | $9 \times 11$ | 9x4 | 9x8 | $9 \times 3$ | $9 \times 6$ |  |
|  | 10x11 | 10x4 | 10x8 | 10x3 | $10 \times 6$ |  |
|  | $11 \times 11$ | $11 \times 4$ | $11 \times 8$ | $11 \times 3$ | $11 \times 6$ |  |
|  | $12 \times 11$ | $12 \times 4$ | 12x8 | 12x3 | 12x6 |  |
|  | 8 | 7 | 6 | 0 | 5 |  |

$=26$ new facts (not including $\times 3$ recap)

## Year 4

| Y4 Autl | Y4 Autl | Y4 Aut2 | Y4 Aut2 | Y4 Spr 1\&2 |
| :---: | :---: | :---: | :---: | :---: |
| Recap and consolidate all times tables and division facts learnt in Year 2 and 3. | $1 \times 12$ | 1×9 | 1×7 | Recap ALL times tables and division facts. <br> Preparation for times table check. |
|  | 2×12 | 2x9 | $2 \times 7$ |  |
|  | $3 \times 12$ | 3x9 | $3 \times 7$ |  |
|  | $4 \times 12$ | 4x9 | $4 \times 7$ |  |
|  | $5 \times 12$ | 5x9 | 5x7 |  |
|  | 6×12 | 6x9 | 6x7 |  |
|  | $7 \times 12$ | $7 \times 9$ | $7 \times 7$ |  |
|  | $8 \times 12$ | $8 \times 9$ | $8 \times 7$ |  |
|  | $9 \times 12$ | 9x9 | 9x7 |  |
|  | 10x12 | 10x9 | $10 \times 7$ |  |
|  | $11 \times 12$ | 11x9 | 11x7 |  |
|  | $12 \times 12$ | 12x9 | $12 \times 7$ |  |
|  | 4 | 3 | 2 |  |

$=9$ new facts

## Appendix

## 1. Active Maths

| Activity | What to do |
| :--- | :--- |
| Jumping cards | Give children one card from a deck of cards. Spread other cards around the room. <br> Jog/dance round the room to music <br> When the music stops find a partner or pick up two cards from around the room <br> Do 5 star jumps! <br> Then multiply your two cards together <br> Swap cards <br> Continue to jog/dance round the room. <br> This can also be done with Uno Cards/ lolly sticks with numbers on |

## 2. Games

| Activity | What to do |  |
| :--- | :--- | :--- |
| Counting in | Use cards from the 2, 5, 10 or 3 times table <br> Put them at one end of a space outside (or hide them!) <br> Find the first card in the sequence/times table <br> Put it down and then run back to get the next card <br> How quickly can you do this? |  |
| Dominoes | Share the dominoes between 2 players. Aim of the game is to get the greatest <br> number. <br> Multiply the 2 numbers together and challenge your partner e.g. $6 \times 6=36$. Your <br> partner chooses one. <br> The person with the greatest answer keeps the dominoes. The person with the most <br> dominoes wins. |  |
| Card game | Use a pack of playing cards without the jack, kings or queens. <br> Take turns to take a card and roll a dice or take two cards. Multiply the numbers. <br> Write down the answer and keep a running total. First person to go over 301 wins. |  |
| Race your partner | Write the numbers 1-12 on your whiteboards/paper. Choose a times table you're <br> learning. Race to see how quickly you can write the multiple facts down. Try this <br> where you write 1-12 randomly. You could also try this with division facts. |  |
| Bingo | Children choose a times table. Choose 6 multiples and place <br> them in a grid. Teacher says a multiplication calculation and if <br> children have the product they cross it out until all 6 are <br> crossed out and the child shouts BINGO! | 0 |
